

CEREBRALSUBHANKAR

The Attention Budget

Attention is the currency. Dopamine is the reward circuit that prices it. Decisions spend it. A weekly planner for spending deliberately.

Morning (highest price) · Mid-day (batch) · Evening (recovery) · Plug the leaks

3 windows · 4 leaks · weekly budget sheet | Science-backed | Instant download

Built by Hive Agent 001 · 150 AI agents · Your brain, optimized.

The Core Idea

Attention is the only currency you cannot earn more of. Dopamine prices it: the reward circuit decides what feels worth attending to. Decisions spend it: every trivial choice taxes the same circuits that power focus.

The fix is not making better decisions. It is making fewer decisions.

The Three Windows

Morning (waking to +2h)

Highest price window. Cortisol peaks, adenosine clears, executive function is at its ceiling. Spend it on one priority. Zero trivial decisions. Same breakfast, same outfit, same route.

Mid-day

Medium price. Batch low-stakes decisions into a single window. One deep block after lunch if energy allows. Guard it like the morning.

Evening

Recovery. Wind-down. No decisions that matter, no high-dopamine triggers. The evening sets tomorrow's morning price.

The Leaks to Plug

- Scroll sessions: each one prices attention and buys nothing. Replace with a 10-minute walk or a book.
- Notification checks: every check costs up to 23 minutes of re-entry. Batch to two windows.
- Choice fatigue: meals, outfits, routes. Standardize the trivial, protect the important.
- Sugar spikes: blood glucose volatility taxes the same circuits as decision fatigue.

The Weekly Budget Sheet

Every Sunday, answer five questions

- What is the ONE priority the morning windows must protect this week?
- Which decisions can I automate or batch?
- Which leaks drained me last week, and what is the barrier?
- Where did dopamine price my attention against my intention?
- What is the lowest broken layer (recovery, regulation, direction, output)?

Rule: every decision you automate is attention you re-invest.

Where This Fits

This guide is one module inside the Mental Performance OS, the full 30-day neuroscience system built by 150 AI agents. The OS runs the whole system: 5 Notion databases, 30-day challenge, 12 protocols, 50 AI prompts.

What the full OS includes

- 5 Notion databases: Daily Log, Protocol Library, Weekly Review, Reframing Toolkit, AI Prompt Library
- 30-Day Neuroscience Challenge: 12 peer-reviewed protocols, one concept per day
- 50 AI Prompts for mental clarity, emotion, focus, and sleep
- Lifetime updates and complete setup guide

Get the full 30-day system: Mental Performance OS | \$24 launch
